As a fresh graduate developer, seeking a dynamic and supportive environment where I can continue to grow and develop my skills with valuable contribution.

EDUCATION

FMSS Bilişim Teknoloji & PatikaDev Frontend Practicum, Online | Qualified to join with exam.   01/2023

Doğuş University, İstanbul | Bachelor's Degree, Computer Engineering.   06/2022

Yeditepe University, İstanbul | Full Scholarship, Electrics and Electronics Engineering.   2019

Burak Bora Anatolian High School, İstanbul | Achieved first place in Turkey by answering all the questions correctly in the final high school entrance exam.   2015

Royal Agricultural University, England | After a 2-month training, I qualified to receive the Preliminary English Test Council of Europe Level B1 certificate at the age of 12.   2008

WORK EXPERIENCE

BNTPRO, İstanbul as Systems and Security Services Assistant Specialist   09/2021 to 09/2022

Operational assistance to the critical companies (Turkcell, Vodafone, TTNET, TEB, VakıfBank, OdeaBank, Toyota and much more) about F5 (A network device which is a full proxy to maintain load balance, security in the network traffic.)

Key Achievements:

- Understanding OSI Layer, process of packet flow and troubleshooting with tcpdump.

- Working with Linux CLI, a lot of F5 configuration knowledge and being familiar with Data Centers.

- Never ending research, learning new technologies and problem solving due to the customer request.

NOKIA, İstanbul as Intern   06/2018 to 09/2018

During my mandatory internship as a student at Yeditepe University, I performed simple but commonly used tasks in the business world under the guidance of my mentor.

SKILLS

Javascript | React.JS | Next JS | Node JS | MongoDB | Firebase | Express JS | Tailwind | Bootstrap | Supabase

LANGUAGES

English (Full professional proficiency) | Turkish (Native)

COVER LETTER

Dear Sir/Madam,

I am a hardworking, responsible, and detail-oriented individual who can conduct accurate research, and I believe that I can quickly become a valuable member of any team without slowing them down.

In summary, my background includes:

Achieving success in a foreign language exam at school at the age of 12 and receiving a two-month English language training in the UK as a result.

Becoming the first-place winner in Turkey in the High School Entrance Exam (SBS) and being accepted to Burak Bora Anatolian High School.

Receiving a scholarship to study Electrical and Electronics Engineering at Yeditepe University, and later graduating from the Computer Engineering program at Dogus University after a lateral transfer.

Before graduation, I started my professional life at a company called BNTPRO and developed myself more in the system and network field. However, because my passion lies in software development, I left the company.

Currently, I am developing my skills mainly in React JS by working on projects. In addition to the skills that a frontend developer should possess, such as converting design to code, making static data dynamic, managing client-side memory, and fetching data, I am also trying to develop my own full-stack projects using mongodb and express. Due to changes in the React documentation and the effectiveness of SSR websites for SEO, I plan to start developing my skills in Next JS and TypeScript in the near future.

My hobbies and interests include spending time with friends, playing football, watching movies or TV shows that have the potential to evoke emotions in me, and playing computer games.

Thank you for considering my application.

Best regards,
Deniz Sarıkaş.
